vii) A description of the method and significant assumptions used during the year to estimate the fair value of options including the following information:

- a) the weighted-average values of share price, exercise price, expected volatility, expected option life, expected dividends, the risk-free interest rate and any other inputs to the model:
- For weighted-average values of share price and exercise price- please refer para V, provided hereinabove.
 - For expected volatility, expected option life, expected dividend, the risk- free interest rate- please refer note no 27 of standalone financial statement.
- b) the method used and the assumptions made to incorporate the effects of expected early exercise – Not Applicable
- c) how expected volatility was determined, including an explanation of the extent to which expected volatility was based on historical volatility - Volatility is a measure of the amount by which a price has fluctuated or is expected to fluctuate during a period. Each vest has been considered as a separate grant. The volatility for periods corresponding to the respective expected lives of the different vests, prior to the grant date has been considered. The daily volatility of the Company's stock price on NSE over these years has been considered.
- d) whether and how any other features of the option grant were incorporated into the measurement of fair value, such as a market condition. – Not Applicable
