

INDIANS MORE INTENT ON **UPSKILLING IN 2023** THAN GLOBAL PEERS

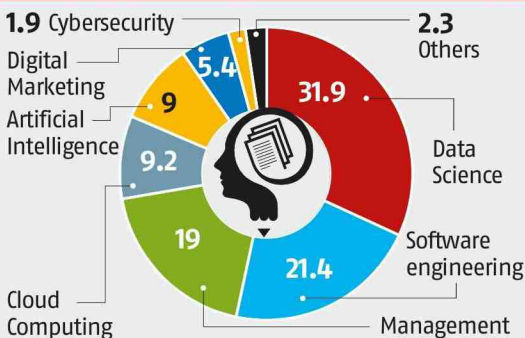

In India, 85 per cent professionals consider upskilling important to future-proof their careers, as against the 76 per cent globally, according to edtech platform Great Learning's "Upskilling Trends Report 2023". The report says 84 per cent Southeast Asian professionals and 76 per cent professionals from Latin America give importance to upskilling. The figures were 64 per cent and 66 per cent from more developed regions like the US and West Asia, respectively.

COMPILED BY SHIVANI SHINDE

With automation set to displace 85 million jobs globally by 2025, many Indian professionals are choosing to learn new digital technologies to cash in on this economic transformation
