NIIT's new multimedia curriculum

New Delhi: NIIT with Adobe has announced the launch of first-ever State-of-the-art NIIT e-GURU Web & Multimedia curriculum for school children, based on world-class adobe creative suite of products.

The newly-launched curriculum will cover the adobe creative suite master collection, which will include- photoshop, illustrator, flash, premiere, encore, soundbooth, after-effects, fireworks, dreamweaver.

The primary objective of introducing such a curriculum is to provide a comprehensive web and multimedia curriculum, based on the widely used professional software from Adobe.

This will give students aspiring for a career in domains like website designing, video editing and sound editing an early access to professional creative tools.

NIIT and Adobe will work together to bring the benefit of multimedia learning to all the stake holders in the schools segment, viz. students, teachers, school management, Government, and administrators.
