

Suite success

NIIT, a leading global talent development corporation and trainer, has introduced six new programmes for graduates and final year students seeking careers in Java, .Net, Web 2.0 using Adobe, Creative Publishing, Systems and Networking and Business Intelligence. These new avant-garde postgraduate diploma programmes are designed to make students job-ready for the industry and their duration will vary from 99 days to up to 200 days.

Announcing the launch of these programmes, G Raghavan, president, Global Individual Learning Solutions, NIIT Ltd, said, "More than ever, these days training needs to prepare youth for jobs, which is why NIIT has launched a suite of job-directed, short-term courses in a bouquet of leading technologies."

The objective of the Java technologies programme is to equip students with core programming skills using Object-oriented Application Development, the Java programming language and the J2EE framework, and create data-driven and data aware client-server applications using server side technologies like Enterprise Java Beans and database technologies like Oracle 9i.

Raghavan said, "The .Net

Six new programmes from NIIT promise to make aspirants job-ready, writes **Kamalika Bhattacharya**

programme has been designed especially for science and engineering graduates and final-year students. The programme equips students with object-oriented programming using C#, RDBMS concepts and SQL skills using Microsoft SQL Server. It also helps develop skills on both Windows Applications Development and Web Applications Development credentials on the .Net

framework.

"This programme on Adobe technologies aims at preparing students on Rich Internet Applications and hence prepares them on Web 2.0 related technologies to develop applications that are richer and more immersive. It also equips students with technologies like Flex, Flash with ActionScript, Dreamweaver etc."

The programme on Creative Designing and Publishing is
